Intern Overview

Name: MUVVALA VISWAKIRAN

User Email: kiranrock1617@gmail.com

Designation: Artificial Intelligence Intern

Batch: December 20, 2023 to April 20, 2024

Projects

Allocated

Projects Allocated

Complete tasks quickly using the source code as a reference.

BASIC Project:

Task 1 : **Sentiment Analysis**: Develop a sentiment analysis tool that can analyze the sentiment (positive, negative, or neutral) of text data, such as social media posts or reviews of Restaurant reviews.

Sentiment Analysis

Task 2 : **Dogs vs. Cats Classification**: Learn how to use deep learning convolutional neural networks to categorize images, gaining skills for advanced AI projects.

Dogs vs. Cats Classification

Task 3 : Combat Online Plagiarism with AI

The internet is flooded with content, making it challenging to spot plagiarism. Our AI-powered tool can help authors and news organizations quickly detect copied content, safeguarding original work. Don't let plagiarism go unnoticed; empower yourself with our plagiarism detection software.

Combat Online Plagiarism with AI

INTERMEDIATE Project:

Task 1 : **Credit Card Fraud Detection**: Use machine learning to detect and prevent fraudulent credit card transactions. Collect, preprocess, train models, and deploy in real-time. Ensure continuous monitoring, compliance with regulations, and collaboration with experts.

Credit Card Fraud Detection

Task 2 : AI Self-Driving Cars: Revolutionizing autonomous vehicles with cutting-edge AI.

AI Self-Driving Cars

ADVANCED Project:

Final Task : **AI-Powered Indoor Obstacle Avoidance**: Create intelligent systems using AI to navigate indoor spaces while *detecting* and *avoiding* obstacles. These systems enhance safety and autonomy for robots, drones, and smart devices in confined environments.

AI-Powered Indoor Obstacle Avoidance
